Help protect your staff and make sure they are visible at all times.

- As an approved supplier to many railway and construction companies we can personalise each vest according to specific roles.
- A vital necessity if you work in any aspect of construction, transportation or warehousing.
- High Visibility Fluorescent vests and jackets are a vital part of your PPE Safety workwear kit.
- Available with your company logo and details on the back they provide added protection and visibility for you staff while still getting your message across.
- Our process of applying logos to clothing is through a heat press, rather than a print, this means your colours stay true and don't fade - unlike printed logos and text.
- We supply the entire range you'd expect and some you may not.
- We can also design and manufacture specific ranges to become part of your company uniform.

WAISTCOATS

Where some may think that a waistcoat is just another disposable item of PPE, we see it as a lifesaver!

Our waistcoats are lightweight, durable and perfect for every day use. All styles incorporate the brightest reflective tape as specified in EN471 and offer a generous fit. There is a large area for printing/badging at the front and rear and our most popular garments are available up to size 6XL.
